SUMMARY

- Software Engineer with 2+ years of experience, using Java and JavaScript/TypeScript as the main language of programming. I helped built applications in three different companies in Brazil.
- Made the direct contact with clients when was necessary and helped my leads with urgent demands that happened all the time in some projects.
- I proposed to the client a recreation of one microservices that was used in the ECommerce project of a big telephone company, and helped in the process of codification of this new microservice in another language.
